

GUYANA

Birdwatching in the Botanical Gardens

EXTENSION

Itinerary

0545hrs pickup and transfer to the extensive and beautiful Georgetown Botanical Gardens where, if we are lucky, we will have views of the Blood-colored Woodpecker. This colorful *Veniliornis* is found only in the Guianas and even there almost wholly limited to the narrow coastal plain. The gardens host Snail Kite, Gray Hawk, Pearl Kite, Carib Grackle, Red-bellied and Red-shouldered Macaws and the rare festive parrots. We will walk on trails in the back of the gardens and may see Yellow-chinned Spinetail, Black-crested Antshrike, Silver-beaked Tanager, Buff-breasted Wren, Golden-spangled Piculet and Ashy-headed Greenlet. You may even want to take a break from birding to feed some manatees in one of the nearby ponds. Return to your hotel.

What you will need

- Comfortable clothes
- Drink - a bottle of water to stay hydrated
- Snacks - this trip will head out before breakfast so make sure you won't be hungry!
- Binoculars
- Camera (and spare batteries)
